About me

Hello, I am a web developer who specializes in the Frontend area also with knowledge of Backend, always eager to learn some new technology related to web development, I consider myself an enthusiastic person, who can work in a team and bring great ideas or solutions to new projects.

Education

Academlo

Full-Stack Developer

I got certified in web development, I had the opportunity to learn languages like JavaScript and others, also in this time I developed several projects, one of them was the Backend and Fronted of an E-commerse.

Experience

Projects

I've had the opportunity to create several applications in which I have designed the architecture, user interface design, programming the interactions on the pages with best practices, and I've knowledge of HTTP Verbs, Python, React, postgress, Javascript, Sass, Css, Django.
